SUMMARY

Full-Stack Engineer with 4+ years of experience building enterprise platforms, scalable APIs, and real-time applications using React, React Native, TypeScript, Node.js, Golang, PostgreSQL, and cloud-native infrastructure on GCP. Strong frontend and product engineering background complemented by experience in backend architecture, distributed systems, microservices, and cloud infrastructure optimization. Experienced in leading end-to-end product development, mentoring developers, and delivering production-ready systems across enterprise and startup environments.

SKILLS

- **Frontend & Mobile:** React, React Native, Next.js, Expo, TypeScript, Vite
- **Backend & APIs:** Node.js, Golang, Python, REST APIs, WebSockets, gRPC, OAuth/JWT
- **Cloud & Infrastructure:** GCP, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Linux
- **Databases & Messaging:** PostgreSQL, MongoDB, Redis, RabbitMQ, NATS
- **Observability & Monitoring:** Prometheus, Grafana, Jaeger, PostHog, Sentry
- **Architecture:** Multi-tenant Systems, Real-time Systems, Distributed Systems, Microservices, Event-Driven Architecture
- **Practices:** Automated Testing, Code Reviews, Agile/Scrum
- **Languages:** Portuguese (Native), English (Fluent), Spanish (Intermediate)

EXPERIENCE

Grupo Malwee Senior Software Engineer

Hybrid
July 2024 - Present

- Architected and developed a full-stack sales planning platform using React, Next.js, PostgreSQL, and GCP, supporting 200+ sales representatives and consolidating workflows from 3 legacy systems.
- Reduced cloud infrastructure costs by over \$2.5k/month through GCP resource optimization and infrastructure right-sizing while maintaining platform reliability.
- Designed frontend and backend architecture, database schemas, authentication systems, and CI/CD pipelines using Docker, Kubernetes, and GitHub Actions.
- Served as a senior technical leader, mentoring engineers, leading architecture discussions, conducting code reviews, and establishing development standards across the team.
- Optimized CI/CD pipelines, reducing build times from 15 to 7 minutes and Docker image sizes from 1GB+ to 500MB.

WEG Full-Stack Developer

Jaraguá do Sul, SC, Brazil
August 2022 - July 2024

- Architected a multi-tenant configurable monitoring platform adopted by 30+ industrial clients, replacing custom-built legacy implementations.
- Developed a low-code backend parametrization system using Node.js and MongoDB, reducing system startup times and onboarding friction by 80%.
- Developed real-time monitoring interfaces and data visualization systems for industrial telemetry workflows using React, WebSockets, and TypeScript.
- Optimized backend queries and API performance for high-volume industrial monitoring and telemetry workflows.

- Collaborated on reusable technical standards and platform architecture later adopted by additional enterprise solutions within WEG.

WEG

Quality Assurance Technician

Jaraguá do Sul, SC, Brazil

February 2020 - August 2022

- Collaborated with WEG Digital teams on IoT monitoring solutions, validating integrations between industrial equipment, telemetry systems, and software platforms.
- Developed process automation tools and testing procedures that reduced operational turnaround time by 20% and improved inspection efficiency.
- Supported international customer audits, compliance validation, and cross-functional initiatives involving hardware, firmware, and software teams.

PROJECTS

Momentz

Founder & Lead Developer (Part-time)

Remote

2024 - Present

- Founded and developed a location-based social platform using React Native, Golang, PostgreSQL, WebSockets, and Oracle Cloud infrastructure.
- Built real-time social platform features including chat, geolocation-based discovery, push notifications, authentication, and analytics systems.
- Implemented PIX split payment integrations to support creator and community monetization features.
- Led product architecture, infrastructure deployment, and mobile application development as sole technical founder.
- Launched the platform in March 2026 and acquired 300+ monthly active users during the initial growth phase.

e-Con Bike

CTO & Co-Founder

Jaraguá do Sul, SC, Brazil

2020 - 2022

- Led development of a hardware/software mobility solution integrating ESP32 microcontrollers with mobile and web applications.
- Built interfaces connecting embedded systems, telemetry, and user-facing platforms.
- Achieved 1st place in the national INOVA innovation competition (2022).

EDUCATION

PUC Minas

Postgraduate Degree in Artificial Intelligence and Machine Learning

Remote

2025

UniSENAI

Bachelor in Control and Automation Engineering

Jaraguá do Sul, SC, Brazil

2018 - 2022

SENAI-CentroWEG

Technical Degree in Electronics

Jaraguá do Sul, SC, Brazil

2018 - 2020
